Amount for the County of San Diego is calculated by dividing the total amount of County program funding (\$32,543,559) by the total countywide population. To determine the actual per capita spending per resident in a specific local jurisdiction, add the amount of that jurisdiction to the County's per capita amount. For example, the total per capita amount for a resident of Carlsbad this current year would be \$16.51, \$5.72 per capita spending for Carlsbad + \$10.79 per capita spending for the County of San Diego.
