Introduction

The intent of the Agency Evaluation Tool is for the agency to honestly evaluate the current state of their own organization in several key areas such as participation in coordinated entry, verification of chronic homelessness, utilization of data, and services provided. The information may be used by the agency and the CoC to generate a technical assistance (TA) plan that will be an effective resource for the agency. Possible types of technical assistance that could be included in the plan include referrals to workshop or training opportunities, sample tools or templates, HMIS guidance, and referrals to articles, best practices and outside experts.

The estimated time it may take an agency to complete this tool is 30-45 minutes per project, although this will likely vary from agency to agency. Agencies that have completed this tool in the past have indicated that the more time they spent completing the tool and reflecting on responses, the more they received from the process in terms of a responsive and helpful technical assistance plan. Due to the range of topics covered in the self-assessment, more than one staff person may need to be involved in its completion so it is recommended to review the list of sections on the next page and plan accordingly.

Each agency that is monitored will complete one survey. Most of the questions relate to agency-level practices, but some are project-specific. For agencies that receive monitoring for multiple projects, the survey is formatted to allow multiple responses to project-specific questions.

Instruction

All monitoring tool are due on Day 1 of your cohorts monitoring start date via Alchemer. The agency will receive a summary report with final results after the on-site visit has been completed.
