\* First Time Homeless represents the number of people who had their first-ever interaction with a program which enters data into our community's HMIS database

\*\* Housed refers to people that reported exiting a program to a housed situation and/or reported moving into housing through one of their program enrollments in HMIS

\*\*\* The total number of Successful Housing Outcomes might be greater than the total number of clients housed since it is possible that a client had multiple program entries in HMIS and these programs may differ in how they report a client successfully being housed.
